EXPERIENCE

AI Engineer **Sep 2025 – April 2026**
The Botss *Karachi, Pakistan*

- Designed and developed AI chatbots, voice systems, automation tools, and scalable backend APIs, translating complex business requirements into production-ready AI solutions.
- Developed a legal AI chatbot using Retrieval-Augmented Generation (RAG), enabling semantic search and accurate retrieval across 6,000+ statutes and 100,000+ legal judgments.
- Optimized RAG pipelines and AI query processing through improved chunking, vector embeddings, caching, and semantic search, reducing latency and improving response accuracy.
- Improved real-time AI chat and voice systems by optimizing concurrency handling, API reliability, error handling, and fallback logic for edge cases.

AI Full Stack **Feb 2026 – Present**
Brandwings *Karachi, Pakistan*

- Developed an AI-powered chatbot for Nawaya, enabling automated customer interactions, form fill, community promotion, and intelligent responses to user queries.
- Built n8n-based social media automation workflows that analyze previous social media posts, generate relevant captions and images using AI, and publish content across Twitter/X, LinkedIn, Instagram, and Facebook.

SKILLS

Languages	Python, JavaScript, TypeScript
AI/LLMs	OpenAI, Claude, Gemini, Hugging Face, AI Agents, RAG, Agentic RAG/AI, Prompt Engineering
Frameworks	FastAPI, Flask, LangChain, LangGraph, PyTorch, Scikit-learn, Pydantic, NestJS, NextJS
Databases	MongoDB, MongoDB Atlas Vector Search, PostgreSQL, Supabase, ChromaDB, FAISS, Neon
Automation	n8n, GoHighLevel, Twilio, ElevenLabs, REST APIs, Webhooks, Git, GitHub

PROJECTS

Legal AI Chatbot for Pakistan Laws View Project

- Developed an Agentic RAG-based legal AI chatbot for legal search and summarization.
- Built the semantic retrieval pipeline using embeddings and vector search, with LangChain and LLMs.

IWM CRM: Pharma Vendor CRM with AI Human Calls View Project

- Developed a CRM platform for pharma vendors with full lead and team management.
- Integrated Twilio for human-to-human calls with automatic transcripts and summaries.
- Built AI agents for automated lead interactions using a knowledge base, with call summaries.
- Enabled messaging and email (inbound/outbound) directly within the CRM interface.

Audifyer: AI-based Voice Cloning & TTS System View Project

- Developed FastAPI-powered PowerPoint-to-video conversion engine with AI voiceovers, 6+ TTS providers, voice cloning, and 70+ languages using PyTorch, Transformers, and FFmpeg
- Built scalable backend with PostgreSQL and async processing, implementing frame-accurate synchronization and GPU optimization, achieving 100% animation extraction accuracy.

EDUCATION

Bachelor of Science in Artificial Intelligence, Dawood University of Engineering & Technology **2021 – 2025**
Karachi, Pakistan
CGPA: 3.74 / 4.0
Key Areas: AI, Machine Learning, Deep Learning, NLP, Software Engineering

ACHIEVEMENTS & CERTIFICATIONS

- Runner-up, University Project Expo (Chatbot Development)
- Google AI Essentials (Coursera)
- Gen-AI & Chatbot (Saylani Mass IT Training)
- Mern-Stack (Hazza Institute)
